

All formulary medication listed are available for First Fill. All initial First Fill prescriptions are capped at \$150 per prescription and no more than a 14-day supply per prescription can be given. In addition to First Fill, the Schedule II Short Acting Opioids are available for two weeks post-injury after the claim is established or two weeks post-surgery. Schedule III Short Acting Opioids are only available for six weeks post-injury or six weeks post-surgery. All other formulary medications listed are available for up to twelve weeks post injury without prior authorization.

Medication on the formulary must be utilized prior to prescribing medication in the same therapeutic class not included on the formulary. Any medication not listed on the formulary must be authorized for payment before a prescription can be filled. An injured worker who receives a brand medication when there is a generic available will be personally liable for the difference in the cost between the Generic and brand Medication in all non-Dispense as Written jurisdictions. Prior authorization is required for all medication twelve weeks after initial date of injury.
